SYLLABUS

B.Sc PART-II

EXAMINATION-2023-24

Scheme of Examination B.Sc. (Pass Course) Part-II

The number of paper and the maximum marks for each paper together with the minimum marks required for a pass are shown in the scheme of examination against each subject separately. It will be necessary for a candidate to pass in the theory part as well as the practical part of a subject/paper. Wherever prescribed separately. Classification of successful candidates shall be as follows:

First Division 60% of the aggregate marks prescribed at (a) Part first

Second Division 48% Examination excluding those obtained in the

compulsory subject (b) Part Second Examination (c)

Part Third Examination taken together.

All the rest will be declared to have passed the Examination. If they obtain a minimum pass marks in each subject viz 36% No division shall be awarded at the Part First and Part Second Examinations:

95-96

1. PHYSICS

Scheme:		•	Max. Marks: 100
Min. Ping Ma	rks: 36		
Paper I	3 hrs, duration	Max. Marks: 33	Min. Pass marks 12
Paper II	3 hrs. duration	Max. Marks: 33	Min. Pass marks 12
Paper III	3 hrs. duration	Max. Marks: 34	Min. Pass marks 12
Practical	5 hrs. duration	Max. Marks: 50	Min. Pass marks 18

Paper-1: Thermodynamics and Statistical Physics

Work Load: 2 hrs. Lecture /week

Examination Duration: 3 Hrs.

Scheme of Examination: First question will be of nine marks comprising of six parts of short answer type with answer not exceeding half a page. Remaining four questions will be set with one from each of the unit and will be of six marks each. Second to fifth question will have two parts namely (A) and (B) each carrying 3 marks. Part (A) of second to fifth question shall be compulsory and Part (B) of these questions will have internal choice.

Unit-1

Thermal and adiabatic interactions: Thermal interaction; Zeroth law of thermodynamics; System in thermal contact with a heat reservoir (canonical distribution); Energy fluctuations; Entropy of a system in a heat bath; Helmholtz free energy; Adiabatic interaction and enthalpy; General interaction and first law of thermodynamics; Infinitesimal general interaction; Gibb's free energy; Phase transitions. Clausius Clapeyron equation; Vapour pressure curve; Heat engine and efficiency of engine. Carnot's Cycle; Thermodynamic scale as an absolute scale; Maxwell relations and their applications.

Unit-2

Production of law temperatures and applications: Joule Thomson expansion and J. I. coefficients for ideal as well as Vander Waal's gas, porous plug experiment, temperature inversion, Regenerative cooling. Cooling by adiabatic expansion and demagnetization; Liquid Helium, He I and He II. superfludity, Refrigeration through Helium dilution. Quest for absolute zero, Nernst heat theorem.

The distribution of molecular velocities: Distribution law of molecular velocities, most probable, average and rims velocities; Energy distribution function; effusion and molecular beam, Experimental verification of the Maxwell velocity distribution; The principle of equipartition at energy

Transport phenomena: Mean free path, distribution of free paths, coefficients of viscosity, thermal conductivity, diffusion and their interaction.

Unit-3

Classical Statistics: Validity of Classical approximation; Phase space micro and macro states; Thermodynamic probability, relation between entropy and thermodynamic probability. Monoatomic ideal gas. Barometric equation: Specific heat capacity of diatomic gas. Heat

**

Quantum Statistics: Black body radiation and failure of classical statistics, Postulates of spantian statistics, undistinguishibility wave function and exchange degeneracy, a priori-probability. Bose 4 insteam statistics and its distribution function; Planck distribution function and radiation; flormula, Fermi-Dirac statistics and its distribution function, contact potential, thermonic circuston; Specific heat anomaly of metals; Nuclear spin statistics (para- and ortholivdrogen).

Paper- 11: Mathematical Physics and Special Theory of Relativity

Work Load: 2 hrs. Lecture /week

Examination Duration: 3 Hrs.

Scheme of Examination: First question will be of nine marks comprising of six parts of short answer type with answer not exceeding half a page. Remaining four questions will be set with one from each of the unit and will be of six marks each. Second to fifth question will have two parts namely (A) and (B) each carrying 3 marks. Part (A) of second to fifth question shall be compulsory and Part (B) of these questions will have internal choice.

UNIT-1

Orthogonal curvilinear coordinate system, scale factors, expression for gradient, divergence, curl and their application to Cartesian, circular cylindrical and spherical polar coordinate.

Coordinate transformation and Jacobian, transformation of covariant, contra-variant and mixed tensor. Addition, multiplication and contraction of tensors: Metric tensor and its use in transformation of tensors.

Dirac delta function and its properties.

UNIT-2

Lorentz transformation, Length Contraction, Time Dilation, Mass variation, rotation in spacetime like and space like vector, world line, macro-causality.

Four vector formulation, energy momentum four vector, relativistic equation of motion, invariance of rest mass, orthogonality of four force and four velocity, Lorentz force as an example of four force, transformation of four frequency vector, longitudinal and transverse Dopplers effect.

Transformation between laboratory and center of mass system, four momentum conservation, kinematics of decay products of unstable particles and reaction thresholds: Pair production, inelastic collision of two particles. Compton effect.

UNIT-3

(a) fransformation of electric and magnetic fields between two inertial frames. Electric field measured in moving frames. Electric field of a point charge moving with constant velocity.

(b) The second order linear differential equation with variable coefficient and singular points, series solution method and its application to the Hermite's, Legendre's and Laguerre's differential equations. Basic properties like orthogonality, recurrence relation graphical representation and generating function of Hermite, Lagendre and Leguerre functions (simple applications).

techniques of separation of variables and its application to following boundary value problems to Laplace equation in three dimensional Cartesian coordinate system-line charge between two earthed parallel plates (ii) Helinholtz equation in circular cylindrical coordinates-cylindrical resonant earths. (iii) Wave equation in spherical polar coordinates the vibrations of a circular membrane. (iv) Diffusion equation in two dimensional Cartesian coordinate system heat conduction in a thin rectangular plate. (v) Laplace equation in spherical coordinate system-electric potential around a spherical surface.

Paper III: Electronics and Solid State Devices

Work Load: 2 hrs. Lecture /week

Examination Duration: 3 Hrs.

Scheme of Examination: First question will be of ten marks comprising of five parts of short answer type with answer not exceeding half a page. Remaining four questions will be set with one from each of the unit and will be of six marks each. Second to fifth question will have two parts namely (A) and (B) each carrying 3 marks. Part (A) of second to fifth question shall be compulsory and Part (B) of these questions will have internal choice.

Unit 1: Circuit analysis and PN junctions

Circuit analysis: Networks- some important definitions, loop and nodal equation based on D.C. and A.C. circuits (Kirchhoffs Laws). Four terminal network: Ampere volt conventions, open, close and hybrid parameters of any four terminal network, Input, output and mutual impendence for an active four terminal network. Various circuit theorems: Superposition, Thevenin, Norton, reciprocity, compensation, maximum power transfer and Miller theorems.

PN junction: Charge densities in N and P materials; Conduction by drift and diffusion of charge carriers, PN diode equation; capacitance effects.

Unit 2: Rectifiers and transistors

Rectifiers: Basic idea of Half-wave, full wave and bridge rectifier: calculation of ripple factor, efficiency and regulation; Filters: series inductor, shunt capacitor, L section and π -section filters. Voltage regulation: Voltage regulation and voltage stabilization by Zener diode, voltage multiplier

Transistors: Notations and volt-ampere characteristics for bipolar Junctions transistor. Concept of load line, and operating point Hybrid parameters, CB, CE, CC configurations. Junction field effect transistor (HFF) and metal oxide semiconductor filed effect transistor (MONFET). Circuit symbols, busing and volt-ampere characteristics, source follower operation of FFT as sagnable voltage resister.

Unit 3: Transistor biasing and amplifiers

Transistor biasing: Need of bias and stability of Q point, stability factors, and various types of bias circuits for thermal bias stability: fixed bias, collector to base feedback bias and four resistor bias.

Suplifiers: Analysis of transistor amphifiers using hybrid parameters and its gain-frequency response basis idea of trascade amplifiers, direct coupled and R.C. coupled amplifiers. Amplifier with feedback Concept of feedback, positive and negative feedback, voltage and corrent teedback streams. Advantage of negative feedback. Stabilization of gain; effect of negative teedback on output and uput resistance, reduction of nonlinear distortion, effect on gain trechency atapears c

Unit 4: Oscillators and Logic Circuits

Uscillators, criteria for self-excited and self-sustained oscillation, circuit requirement for buildup of oscillation. Basic transistor oscillator circuit and its analysis, Colpit's and Hartely

Engic circuits: Logic fundamentals: AND, OR, NOT, NOR, NAND, XOR gates, Boolean algebra. De Morgan's theorem, positive and negative logic, logic gates circuit realization using DIT and HIL logic, simplification of Boolean expressions.

PRACTICAL

Teaching: 4 hrs/week Practical One-Paper

5 hrs. duration

Min Pass Marks: 18

Max: Marks: 50

Note: Total number of experiments to be performed by the students during the session should be 16 selecting any 8 from each section.

Section-A

Study of dependence of velocity of wave propagation on line parameter using torsional wave apparatus.

2. Study of variation of reflection coefficient of nature of fermination using torsional wave apparatus.

Using platinum resistance thermometer find the melting point of augiven substance.

Using Newton's rings method find out the wave length of a monochromatic source and find the refractive index of liquid.

5. Using Micheloson's interferometer find out the wavelength of given monochromatic source (Sodium Light)

To determine dispersive power of prism.

To determine wave length of sodium light using grating.

To determine wave length of sodium light using Biprism?

Determine the thermodynamic constant $\gamma = \frac{C_p}{C_p}$ using Clement's & Desorme's method.

10. To determine thermal conductivity of a bad conductor by Ece's

11. Determination of ballistic constant of a ballistic galvanometer.

12. Study of variation of total thermal radiation with temperature. Section-B

1. Plot thermo emf versus temperature graph and find the neutral temperature (Use sand bath),

Study of power supply using two diodes/bridge rectifier with various filter circuits.

Syllabus : B.Sc. Part-II

- Study of half wave rectifier using single diode and application of L and π section filters.
- 4. To study characteristics of a given transistor PNP/NPN (common emitter, common base and common collector configurtainos).
- 5. Determination of band gap using a junction diode.
- 6. Determination of power factor (cos θ) of a given coil using GRO.
- 7. Study of single stage transistor audio amplifier (variation of gain with frequency).
- 8. To determine elm by Thomson's method.
- 9. Determination of velocity of sound in air by standing wave method using speaker, microphone and GRO.
- 10. Measurement of inductance of a coil by Anderson's bridge.
- 11. Measurement of capacitance and the lectric constant of a liquid and gang condensor by de-Sauty bridge.

2. CHEMISTRY

Schemer

Max Marks: 150) uration (hrs.)	Max. Marks	Min. Pass Marks
Paral H. S.	3	33	
Paper II	1 3	33	36
Puncielli 1	3	34	
Practical	5	50	18

Note: Len (10) questions are to be set taking two (02) questions from each unit. Candidates have to answer any 5 questions selecting at least one question from each unit.

CH-201 Paper-1: Inorganic Chemistry (2 hrs or 3 periods/week)

Unit-I

Chemistry of Elements of First Transition Series:

tourneteristic properties of d-block elements. Properties of the elements of the first transition series, their pinary compounds and complexes illustrating relative stability of their oxidation-states coordination number and geometry.

Chemistry of Elements of Second and Third Transition Series:

Cieneral characteristics, comparative treatment with their 3d-analogues in respect of ionic radii, oxidation states magnetic behaviour, spectral properties and stereochemistry.

Unit-II

Coordination Compounds:

Werner's coordination theory and its experimental verification, effective atomic number concept, chelides, nomenclature of coordination compounds, isomerism in coordination compounds, valence bond theory of transition metal complexes.

Unit-III

Chemistry of Lanthanide and Actinide Elements:

I become structure, oxidation states, tense radii and lanthanide contraction, complex formation, occurs, necessarily solution of lanthanide compounds.

General teatre. Chemistry of separation of Np. Pu and Am from Ledectronic configuration, oxidetion starte magnetic properties, comparison behaviors comparison of furthanides and accordes case beavy elements.

Unit IV

Oxidation and Reduction:

Control Region Professional Anna maly as not take the desired ox stability may ster a fine a fattener and thombal setting in a Application of reducing the second extraction of elections.

1 nit-V

Acids and Bases:

Theories Ambenius, Bronsted-Lowry, Lux-Flood, Solvent system concept and Lewis concept of acids and bases.

Non-aqueous Solvents:

Physical properties of a solvent, types of solvents and their general characteristics, reactions in non-aqueous solvents with reference to liquid NH_3 and liquid SO_2

CH-202 Paper-II: Organic Chemistry (2 Hrs. or 3 periods/week)

Unit-I

Electromagnetic Spectrum: An Introduction

Absorption Spectroscopy

Eltraviolet (UV) spectroscopy - Absorption laws (Beer-Lambert Law), molar absorptivity, presentation and analysis of UV spectra, types of electronic transitions, effect of slovents on transitions, effect of conjugation. Concept of chromophore and auxochrome. Bathochromic, hypsochromic, hyperchromic and hypochromic shifts. UV spectra of conjugated dienes and enones.

Infrared (IR) spectroscopy - Molecular vibrations, Hook's law, selection rules, intensity and position of IR bands, measurement of IR spectrum, fingerprint region, characteristics absorption of various functional groups and interpretation of IR spectra of simple organic compounds.

Unit-II

Alcohols - Classification and nomenclature.

Monohydric alcohols - Methods of formation by reduction of aldehydes, ketones, carboxylic acids and esters. Hydrogen bonding, Acidic nature. Reactions of alcohol with mechanism. Dihydric alcohols - methods of formation, chemical reactions of vicinal glycols, oxidative cleavage [Pb(OAc)] and HIO4] and pinacol-pinacolone rearrangement. Inhydric alcohols - methods of formation, chemical reactions of glycerol.

Phonols

Nomenclature structure and bonding. Preparation of Phenols. Physical properties and acidic character. Comparative acidic strength of alcohols and phenols. Reactions of phenols-electrophilic aromatic substitution, acylation and carboxylation. Mechanisms of Eric-rearrangement, Claisen rearrangement, Gatterman synthesis. Hauben-Hoeseh reaction. Lederer Manassi reaction and Reimer-Liemann reaction.

Ethers and Epoxides

Method of formation physical properties Chemical reactions ocidates and autooxidation diesels method.

Southern are provided to the control of the control o

rubulary and reactions of Grighard and organolithium reagents with epoxides

Unit-III

Aldehydes and Ketones

Structure of the earbonyl group. Syntheses of aldehydes from acid chlorides, synthesis of aldehyde, and ketone, using 1.3-dithianes, syntheses of ketones from nitriles and from earboxylic acids. Physical properties.

Mechanism of anticleophilic additions to carbonyl group with particular emphasis on benzoin, aldol. Perkin and Knoevenagel condensations. Condensation with ammonia and its derivatives. Wittig reaction, Mannich reaction. Oxidation of aldehydes, Baeyer-Villiger oxidation of ketones. Cannizzaro reaction, MPV (Meervein-Pondrof-Verley), Clemmensen, Wolff-Kishner, LiAlH₄ and NaBH₄ reductions, Halogenation of enolizable ketones. Use of acetals and 1,3-dithiane as protecting group.

Unit-IV

Carboxylic Acids

Structure and bonding, physical properties, acidity of carboxylic acids, effects of substituents on acid strength. Preparation of carboxylic acids. Reactions of carboxylic acids, Hell-Volhard-Zelinsky reaction. Reduction of carboxylic acids, mechanism of decarboxylation.

Methods of formation and chemical reactions of halo acids. Hydroxy acids - malic, tartaric and citric acids.

Dicarboxylic acids: methods of formation and effect of heat and dehydrating agents (succinic, glutaric and adipic acids).

Carboxylic Acid Derivatives

Structure, nomenclature and synthesis of acid chlorides, esters, amides and acid anhydrides. Relative statil to of acyl derivatives. Physical properties, interconversion of acid derivatives by nucleophilic at visubstitution.

Preparation of carboxylic acid derivatives, chemical reactions, mechanisms of esterification and bydrolysis racidic and basic).

Unit-V

Organic Compounds of Nitrogen

Preparation of nitroalkanes and nitroarenes. Chemical reactions of nitroalkanes. Mechanisms of nucleophilic abstitution in nitroarenes and their reductions in acidic, neutral and alkaline media. Pieric acid

Amines: Structure, nomenclature and preparation of alkyl, and aryl amines (reduction of nitro-compounds nutriles), reductive amination of aldehydre and ketonic compounds. Physical properties stereochemistry of amines. Separation of a mixture of primary, secondary and tertiary amines. Structural features effecting basicity of amines. Amine salts as phase-transfer catalysts. Gabri 1-31:164-anide reaction and Hoffmann bromamide teas son with mechanism.

Reaction of annex electrophilic aromatic substitution in and ammes, reactions of ammes with patients of a large transformation and mechanism. Symbolic transformations of aryl diazonium salts, aromatic couples, and its applications.

30

(2 Hrs. or 3 periods/week)

UNIT-L

Thermodynamics - I

Definition of Thermodynamic Terms: System, surroundings, etc. Types of systems, intensive and extensive properties. State and path functions and their differentials. Thermodynamic

process, concept of heat and work.

First Law of thermodynamics: Statement, definition of internal energy and enthalpy, heat capacity, heat capacities at constant volume and pressure and their relationship. Joule's law, Joule-Thomson coefficient and inversion temperature. Calculation of w, q, dU & dH for the expansion of Ideal gases under isothermal and adiabatic conditions for reversible process.

Thermochemistry: Standard state, standard enthalpy of formation, Hess's law of heat summation and its applications. Heat of reaction at constant pressure and at constant volume. Enthalpy of neutralization. Bond dissociation energy and its calculation from thermo-chemical data, temperature dependence of enthalpy. Kirchhoff's equation.

UNIT-II

Thermodynamics -II

Second Law of Thermodynamics: Need for the law, different statements of the law. Carnot cycle and its efficiency. Carnot-Theorem. Thermodynamic scale of temperature.

Concept of Entropy Entropy as a state function, entropy as a function of V&T, entropy as a function of P&T, entropy change in physical change. Clausius inequality and entropy as a criteria of spontaneity and equilibrium. Entropy change in ideal gases and mixing of gases.

Third Law of Thermodynamics: Nernst heat theorem, statement and concept of residual entropy, evaluation of absolute entropy from heat capacity data. Gibbs and Helmholtz functions: Gibbs function (4) and Helmholtz function (A) as: thermodynamic quantities. A & G as criteria for thermodynamic equilibrium and spontaneity, their advantage over entropy change. Variation of G and A with P. V and T.

Chemical Equilibrium:

Equilibrium constant and free energy. Thermodynamic derivation of law of mass action. Le Chatelier's principle. Reaction Isotherm and reaction isochore. Clapeyron equation and Clausius-Clapeyron equation, applications.

UNIT-III

Phase Equilibrium: Statement and meaning of the terms: phase, component and degree of freedom, derivation of Gibbs phase rule, phase equilibria of one component system - water, CO₂ and sulphur systems

Phase equilibria of two component system - solid-liquid equilibria simple eutectic BisCa. Phase systems, de absorization of lead

Solid solutions: compound formation with Congruens means point (Mg-Zn) and cochect and malting point (NaCoHO) System Freezing sustains sectionedly re-

Liquid-Liquid mixtures Ideal liquid mixtures. Raoult's and Henry's law. Non ideal's serve according to the Liquid ethanol scatter systems. Partial misselfs, liquids; phenol-water contained appearance temperature. Servet and appearance temperature. Servet distributions application.

UNIT-IV

trochemistry -1

Electrical transport-conduction in metals and in electrolyte solutions, specific conductance and equivalent conductance, measurement of equivalent conductance, variation of equivalent and specific conductance with dilution.

Migration of ions and Kohlrausch law. Arrhenius theory of electrolyte dissociation and its limitations, weak and strong electrolytes. Ostwald's dilution law, its uses and limitations. Debye-Huckel-Onsoger's equation for strong electrolytes (elementary treatment only). Transport number definition and determination by Hittorf's method and moving boundary method.

Applications of conductivity measurements:

Determination of degree of dissociation, determination of Ka of acids, determination of solubility product of a sparingly soluble salt, conductometric titrations.

UNIT-V

Electrochemistry -II

Types of reversible electrodes: Gas-metal- ion, metal-metal ion, metal-insoluble salt anion and redox electrodes, electrode reactions, Nernst equation, derivation of cell E.M.F. and single electrode potential, standard hydrogen electrode, reference electrodes, standard electrode potential, sign conventions, electrochemical series and its significance.

Electrolytic and Galvanic cells - reversible and irreversible cells, conventional representation of

electrochemical cells.

EMF of a cell and its measurements, Computation of cells EMF. Calculation of thermodynamic quantities of cell reactions (ΔG , ΔH and K), polarization, over potential and hydrogen overvoltage.

Concentration cell with and without transport, liquid junction potential, application of concentration cells. Valency of ions, solubility product and activity coefficient, potentiometric litrations.

Definition of pland pKa, determination of pH using hydrogen quinhydrone and glass electrodes. by potentiometric methods.

Suggested Books:

Principles of Physical Chemistry: B. R. Puri, Sharma and M. S. Pathania.

A Text Book of Physical Chemistry, A.S. Negi and S. C. Anand.

3 A Text Book of Physical Chemistry, Kundu and Jain.

The elements of Physical Chemistry, P.W. Arkins, Oxford,

University General Chemistry, C.N.R. Rao, Mac Millan.

CH- 204 Chemistry Practical (Pass course), Laboratory Course-II (4 hrs or 6 periods / week)

Inorganic Chemistry

(i) Preparation of Standard Solutions

Offiction | 0.1 M to 0.001 M solutions

(ii) Volumetric Analysis

- cas Determination of acetic acid in commercial vinegar using NaOH
- the Determination of alkali content in intacts tablet using HCI
- to distingation of calcium content to thather calcium oxalate by permangarounces

Listimetion of nardness of water by EDTA

Text Estimation of ferrous and ferric by dichromate method

of Estimation of copper using thiosulphate

(iii) Gravimetric Analysis

a Chartuses

ab. Ni as Ni (dimethylgly oxime)

Organic Chemistry

(i) Laboratory Techniques

A. Thin Eaver Chromatography

Determination of R₁ values and identification of organic compounds.

(a) Separation of green leaf pigments (spinach leaves may be used).

- (b) Preparation and separation of 2,4-dinitrophenylhydrazones of acetone, 2-butanone, hexan-2-one and hexan-3-one using toluene and light petroleum (40-60) solvent
- (c) Separation of a mixture of dyes using cyclohexane and ethyl acetate (8.5:1.5)

B. Paper Chromatography: Ascending and Circular

Determination of R_f values and identification of organic compounds.

- Separation of mixture of phenylalanine and glycine. Alanine and aspartic acid. eucine and glutamic acid. Spray reagent - ninhydrin. (a)
- Separation of a mixture of DL alanine, glycine and I -Leucine using n-butanol: acetic held water (4-1.5). Spray reagent-ninhydrin. (D)
- Separation of monosaccharides a mixture of D- galactose and D-Fructose Using n-butanol acetone : water (4:5:1) Spray reagent -aniline hydrogen phthalate. (0)

(ii) Qualitative Analysis

Identification of two organic compounds (one solid and one liquid) through the functional group analysis, determination of melting point, boiling point and preparation of smable derivatives.

Physical Chemistry

(i) Transition Temperature

a) Determination of the transition temperature of the given substance by thermometricdialometric method (e.g. MnCl₂.4H₂O / SrBr₂.2H₂O).

- a) To determine the solubility of benzoic acid at different temperatures and to determine (ii) Thermochemistry 2. Hol the dissolution process.
 - b) To determine the enthalpy of neutralization of a weak acid-weak base versus strong base strong acid and determine the enthalpy of ionization of the weak acid weak
 - c) To determine the enthalpy of solution of solid calcium chloride and calculate the sattice energy of eal, numeritoride from its enthalpy data county Born-Haber cycle

as to study the effect of a solute reg. Sact, success sends on the entical solution (iii)Phase Equilibrium compensation of the probably miscible liquids to a physiological system) and to pletermine the concern men of that solute in the governor sand when system. Dailstan

*

To construct the phase diagram of two components (e.g. diphenylaminebenzophenone) system by cooling curve method.

(iv)Distribution law

a) To study the distribution of iodine between water and CCIs.

by the study the distribution of benzoic acid between benzene and water.

(Instructions to the Examiner) B.Sc. Part II CH- 204 Chemistry Practical (Pass course)

Max. Marks: 50

Duration of Exam:5 hrs.

Minimum Pass Marks:18

Inorganic Chemistry

Ex. 1 Volumetric Analysis

or

Gravimetric Analysis as mentioned in the syllabus

3. ZOOLOGY

B. Sc. Part II - 2020

Scheme:

Max. Marks: 100

Min. Marks: 36

121, 11, 11, 11, 11, 11, 11, 11, 11, 11,		
	: 3 Hrs duration	33 Marks
Paper I		33 Marks
Paper II	: 3 Hrs duration	34 Marks
Paper III	: 3 Hrs duration	
	: 4 Hrs duration	50 Marks
Practical	. 4 1113	

NOTE:

There will be two parts of every theory question paper with a total duration of 3 hours. First part of question paper will comprise of question No. 1 containing 9 (Paper I & II) 1. or 10 (Paper III) very short answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering entire syllabus.

Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part, i.e., three from each unit /section out of which candidate will be required to attempt any 4 questions selecting at least one question from each unit/section. Each question will carry 6 marks.

The candidate has to answer all questions in the main answer book only. 2.

PAPER - I: Z-201 STRUCTURE AND FUNCTION OF INVERTEBRATE TYPES

- There will be two parts of this theory question paper with a total duration of 3 hours. NOTE: First part of question paper will comprise of question No. 1 containing 9 very short 1. answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering entire syllabus. Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part, i.e., three from each unit /section, out of which candidate will be required to attempt any 4 questions selecting at least one question from each unit/section. Each question will carry 6 marks.
- The candidate has to answer all questions in the main answer book only. 2.

Section - A

Habit Habitat, Morphology, Structure, Organs and Systems (Locomotion, Digestive, Circulatory, Respiratory, Excretory, Nervous & Reproductive), Life Cycle, *Affinities and *Adaptations.

Note: * indicates whenever required.

Arthropoda: Palaemon (Indian Fresh water Prawn), Scorpion, Periplaneta, Grasshopper, Apis. Onychophora :Peripatus.

Section - B

Habit, Habitat, Morphology, Structure, Organs and Systems (Locomotion, Digestive, Circulatory, Respiratory, Excretory, Nervous & Reproductive), Life Cycle,*Affinities and *Adaptations.

Note: * indicates whenever required.

Mollusca: Pila, Unio, Sepia

Echinodermata: Asterias, Echinus, Cucumaria.

Hemichordata: Balanglossus and its phylogenetic significance

Section - C

Invertebrate Adaptations

- Salient features of Hemichordata. 1.
- Evolution of canal system of sponges. 2.
- Parasitic adaptations in Helminthes. 3.
- Social organization in termites and honey bees. 4.
- Direct and indirect development in insects. 5.
- Water vascular system of starfish. 6.
- Crustacean larvae & mouth parts of insects. 7.
- Parasitism in Crustacea. 8.

PAPER – II: Z-202 ANIMAL PHYSIOLOGY AND BIOCHEMISTRY

- There will be two parts of this theory question paper with a total duration of 3 hours. NOTE: First part of question paper will comprise of question No. 1 containing 9 very short 1. answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering entire syllabus. Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part, i.e., three from each unit /section, out of which candidate will be required to attempt any 4 questions selecting at least one question from each unit/section. Each question will carry 6 marks.
 - The candidate has to answer all questions in the main answer book only. 2.

Section - A

Animal Physiology with special reference to mammals

Physiology of digestion: Various types of digestive enzymes and their digestive action 1.

Physiology of blood circulation: Composition and functions of blood; mechanism of in the alimentary canal. blood clotting; heart beat; cardiac cycle; blood pressure; body temperature regulation. 2.

Physiology of respiration: Mechanism of breathing; exchange of gases: transportation 3.

of oxygen and carbon dioxide in blood; regulation of respiration.

Physiology of excretion: Kinds of nitrogenous excretory end products (ammonotelic, uricotelic and ureotelic); role of liver in the formation of these end products. 4. Functional architecture of mammalian kidney tubule and formation of urine; hormonal regulation of water and electrolyte balance (Homeostasis).

Section-B

Regulatory aspects of Animal Physiology

- Physiology of nerve impulse and reflex action: Functional architecture of a neuron, origin and propagation of nerve impulse, synaptic transmission, reflex arc. 1.
- Physiology of muscle contraction: Functional architecture of skeletal muscles; chemical and biophysical events during contraction and relaxation of muscle fibers. 2.
- Types of endocrine glands, their secretions and functions: Pituitary, adrenal, thyroid, 3. pancreas, testis and ovary.
- Physiology of Reproduction: Hormonal control of male and female reproduction, 4. implantation, parturition and lactation in mammals.
- Preliminary idea of neurosecretion, hypothalamic control of pituitary function. 5.

Section-C

Biochemistry

Carbohydrates: Structure, function and significance; oxidation of glucose through glycolysis, Kreb's cycle and oxidative phosphorylation; interconversion of glycogen 1. and glucose in liver; role of insulin and glucagon.

Proteins: Structure, function and significance, essential and non-essential amino acids, transformation of amino acids: deamination, transmination, decarboxylation. 2. Synthesis of protein and urea, fate of ammonia (Ornithine cycle), fate of carbon

Lipids: Structure, function and significance; Beta-oxidative pathway of fatty acids; brief account of biosynthesis of triglycerides. Cholesterol and its metabolism. 3.

Paper - III: Z-203 Immunology, Microbiology & Biotechnology

There will be two parts of this theory question paper with a total duration of 3 hours. NOTE: First part of question paper will comprise of question No. 1 containing 10 very short 1. answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering entire syllabus. Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part, i.e., three from each unit /section, out of which candidate will be required to attempt any 4 questions selecting at least one question from each unit/section. Each question will carry 6 marks.

The candidate has to answer all questions in the main answer book only. 2.

Section - A

- Immunology: Definition, types of immunity: innate and acquired; humoral and cell Immunology 1. mediated, Organs of immune system.
- Antigen and antibody: Antigenicity of molecules, haptens, antibody types.
- reaction, agglutination 2. Precipitation reaction, reactions: Antigen-Antibody neutralizing reaction, complement and lytic reactions and phagocytosis. 3.
- Immunity Regulating Cells: Macrophages, lymphocytes (B and T-Types) T-helper cells, T-Killer cells, plasma cells and memory cells. 4.
- Mechanism of humoral or antibody mediated immunity and cell mediated immunity. 5.

Section - B

- Brief introduction to the History of Microbiology: Work of Anatony Van Microbiology Leeuwenhoek, theory of spontaneous generation, germ theory of fermentation and disease: Works of Louis Pasteur, John Tyndall, Robert Koch and Edward Jenner.
- The Prokaryota (Bacteria): Structural organization: 2.
 - Size, shapes and patterns of arrangement. (i)
 - Structural organization: Slime layer (capsule), cell envelopes: cytoplasmic membrane (inner membrane). Cell wall (outer membrane) of Gram- negative (ii) and Gram-positive bacteria; mesosmes; cytoplasmic organization; cell projections: flagella and cilia.
- Genetic material of Bacteria: Chromosome, replication of bacterial DNA.
- Reproduction in Bacteria: Asexual reproduction, binary fission, budding, endospore 3. formation, exospores and cyst formation; sexual reproduction, conjugation. 4.

- 5. Microbial Nutrition: Culture of bacteria
 - a. Carbon and energy source
 - b. Nitrogen and minerals
 - c. Organic growth factors
 - d. Environmental factors: Temperature and pH
- 6. Bacteria of Medical Importance:
 - (i) Gram-Positive
 - a. Cocci: Staphylococci, Streptococci
 - b. Bacilli: Diptheria, Tetanus.
 - (ii) Gram-Negative
 - a. Cocci: Gonnorhea, Meningitis
 - b. Bacilli: Diarrhoea
 - (iii) Mycobacteria: Tuberculosis, Leprosy

Section - C

Biotechnology

- 1. Definition, history, scope and application of biotechnology, major areas of biotechnology (microbial, plant and animal biotechnology).
- 2. Vectors for gene transfer.
- 3. Basic concepts of animal cell, tissue, organ and embryo culture.
- 4. Genetic engineering (outline idea only): Applications of genetic engineering, hazards and regulations.
- 5. Protoplast fusion in prokaryotes and eukaryotes.
- 6. Recombinant DNA technology; hybridomas and their applications, PCR. DNA finger printing, DNA foot printing. RFLP, RAPD & AFLP, Human genome project.
- 7. Monoclonal antibodies and their applications.
- 8. Brief account of cloning: its advantages and disadvantages.
- 9. Biotechnology in medicine (outline idea only), antibiotics, vaccines, enzymes, vitamins, artificial blood.
- 10. Environmental Biotechnology (outline idea only): Metal and petroleum recovery, pest control, waste water treatment.
- 11. Food, drink and dairy biotechnology (outline idea only): Fermented food production; dairy products, wine, beer, vinegar and food preservation.

Practical - Zoology

Min. Marks: 18

A.

4 Hrs. / Week

Max. Marks: 50

I. Study of Museum Specimens:

Onychophora

Peripatus

:

:

:

:

Arthropoda

Limulus, Spider, Scorpion, Centipede, Millipede, Lepas, Balanus, Squilla, Eupagurus, Crab, Mantis,

Honey-bee, (queen, king, worker) Locust,

Silkworm Moth, Beetle, White grub.

Mollusca

Chiton, Aplysia, Cypraea, Mytilus, PearlOyster,

Dentalium, Loligo, Nautilus.

Echinodermata

Pentaceros,

Echinus,

Ophiothrix,

Cucumaria, Antendon.

Hemichordata

Balanoglossus.

II. Study of Microscopic Slides:

Arthropoda

V.S. of integument (cuticle): *Pediculus*, Bedbug, Termite and its castes, *Cyclops*, *Daphnia*, crustacean larvae (Nauplius, Metanauplius, Zoea, Mysis, Megalopa, Phyllosoma), statocyst of prawn.

Mollusca

V.S. of shell, T.S. gill of Pila, T.S of gill of

Unio, Glochidium larva.

Echinodermata

Larval forms

III. Anatomy:

Prawn/Squilla

External features, appendages, alimentary canal and

nervous system; Hastate Plate

Pila

External features, pallial organs and nervous

system; osphradium, radula.

IV. Study of the Following Through Permanent Slide Preparation:

- (i) Study of different cell types -Blood smear (Wrights or Leishman stain).
- (ii) Ospharadium, gill lamella and radula of pila.
- (iii) Statocyst and Hastate plate of Prawn/Squilla

V. Microbiology Immunology and Biotechnology:

- 1. Preparation and use of culture media for microbes.
- 2. Study of microbes in food materials like curd, etc (Gram +ve& Gram-ve bacteria, Aspergillus, Mucor, Rhizopus, Penicillium, Alternaria and Fusarium).
- 3. Educational tour to any Microbiology laboratory/ Dairy/ Food processing factory/ Distillery. Collection of material may also be encouraged wherever possible. Candidates are required to submit a detailed report of the visit.
- 4. Antigen-antibody reactions-precipitation, agglutination.

VI. Animal Physiology:

- 1. Counting of red and white blood cells in the given blood sample.
- 2. Estimation of hemoglobin in the given blood sample.
- 3. Estimation of haematocrit value (PCV) in the given blood sample.
- 4. Demonstration of enzyme activity (catalase) in liver.
- 5. Study of salivary digestion of starch and the effect of heat and alcohol on salivary digestion of starch.
- 6. Study of histological structure of major endocrine glands of mammals.

VII. Biochemistry:

- 1. Detection of protein, carbohydrate and lipid in the animal tissue/food samples.
- 2. Identification of different kinds of mono-, di- and poly-saccharides in the given food samples.
- 3. Circular Paper chromatography of dyes/amino acids.

B.Sc. Part - II Scheme of Practical Examination Distribution of Marks

Time: 4 Hrs.

4

Min. Pass Marks.: 18

Max. Marks: 50

		Regular	Ex. /N.C. Students
1.	Anatomy (any system)	6	5
2.	Permanent Preparation	4	6
3.	Exercise in Microbiology/immunology/Biotechnology	4	6
4.	Exercise in Animal Physiology	5	6
5.	Exercise in Biochemistry	5	6
6.	Identification and comments on Spots (1 to 8)	16	16
7.	Viva Voce	5	5
8.	Class Record	5	<u>-</u>
-		50	50

Notes:

- 1. Anatomy: Study of systems of the prescribed types with the help of dissection.
- 2. With reference tomicroscopic slides, in case of non-availability, the exercise should be substituted with diagrams/ photographs.
- 3. Candidates must keep a record of all work done in the practical class and submit the same for inspection at the time of the practical examination.
- 4. Mounting material for permanent preparations would be as per the syllabus or as available through collection and culture methods.
- 5. It should be ensured that animals used in the practical exercises are not covered under the wild life act 1972 and amendments made subsequently.

1. The will be 5 questions in each paper All questions are Candidate has to answer ail questions in the main answer book only

2. The with have 18 very short answer type Questions (not more than 20 words) of had har ewering entire syllabus.

Acres asserts divided into four units. There is different question from each unit. These 11 5 2 5 will have internal choice

A.

PAPER-I. Molecula: Brings and Biotechnology 2018 (week)

Unit-1

Genetic Material: Biological, chebics, and physical nature of heredity material. Structure of DNA and RNAs (mRNA, tRNA and RNA) Watson and Crick model of DNA. Nucleosome model (1997)

DNA replication: Meselson - Stahl experiment of semiconservative replication of DNA; RNA Primers. Okazaki-fragments, polymerases; DNA-Protein interactions.

Prehimmary account of DNA damage and repair.

Unit-2

Central dogma of life. Transcription in eukaryotes: role of promoter, gene pre mRNA synthesis, pre mRNA processing: capping, splicing and polyadenylation.

Translation penetic code (codon) formation elongation and termination

Regulation of gene expression in prokaryotes and eukaryotes: Negative and positive control attenuation and amaterialisticin. Reverse transcriptase and its application

Unit-3

Biotechnology: Functional definition Basic aspects of Plant tissue culture, basal medium, media preparation and definition basic concept of cellular totipotency: Calcasing Differentiation and morphogenesis. Micropropagation; Tissue culture and its applications Basic concept of Protoplast culture. Vither culture, Embryo culture and their applications.

Unit-4

Recombinant DNA technology. Teachs and techniques used in rDNA technology - Restrict on enzymes. Access for a ransfer Bacteriophage, plasmids, cosmids and Artificial chromosome, dDNA technology, gene amplification. Polymerase chain reaction. Application of PCR technique. DNA image printing and its uses. Application of Biotechnology and Transge is plants.

Paper-II PLANT PHYSIOLOGY AND BIOCHEMISTRY

(2 hrs week)

Unit 1

William Smalltare, physical factors is properties, importance to plant life, concept of water potential. At expition and transport of suger: Ascent of sap. Transpiration, Gustation, stomatal movement, factors affecting transpiration. Cattation.

Mineral Nu cition: Essential micro and macro nutrients; their uptake, hydroponics-and nutrient requirement deficiency and toxicity symptoms.

Transport of organic substances: Mechanisms of phloem transport, factors regulating the translocations of nutrients

Unit-2

Photosynthesis: Pigments, Photosynthetic apparatus, light reaction, photo system I & 11 / sceneme, photophosphorylation, C3 (Calvin cycle), C4 cycle, and factors affecting the

Resonation - Aerobic and anaerobic respiration: RQ (Respiratory Quotient), Kreh's cycle, electron tral pert system, oxidative phosphary lation, and factors affecting the process. Fermentation

Unit-3

Convictantes distructuement importance, nomenclature, classification, molecular structure & function of mono, strong contractes, their properties gry cosidic tinkages and gly coprotein.

Year o acids-structure, electrochemical properties, peptide bonds, chemical bonds and to a concern, structure and classification of proteins, physical and chemical properties

for med Sincure anomenclature & classification of enzyme. Characteristics of commendation of action, multi-enzyme system, regulation of enzyme activity.

Lagrana support mee of fatty acids (saturated and unsaturated). Alpha and Beta oxidation. By the connection and application of secondary metabolites

Init-4

Proceeds of and service and development. Soul dormancy and permission, plant movement, By a many class of their regulations have a

Marshar at very fixure or place and the mechanism of action concept of florigen and M. Salvery

the creaments of the problems of the control of the aid ABA, discovery & plassiological effects

 - 17 R Q. by Ganong's respirometer
 - 18 Trassrement of growth using auxanometer

Paper III Pteridophytes, Gymnosperms & Palaeobotany (2 hrs. week)

Unit-1

The first and acts of Pierr opingles. Classification (G.M. Smith). Distribution and alternation of the first opingles of Pierrdophysis. I asporangiate and leptosporangiate development of Social Las Angamy, and experience for the series of morntance of Pierrdophysis.

€ nit-2

M. sphological anatomy and reproduction of P. Josum. Selagine Ha. Equiverum and Marsilea.

Characteristics of Gymnosperms, distribution and classification (K.R.Sporne).

Unit-3

Merphelogy, anatomy, reproduction and life cycle of Cycas, Pinus and Ephedra. Economic migortance of Gymnosperms.

Unit-4

De les le forsilization le pes of fosses fectinades of study et fossels. Geological time scale il en decelland plant. Ringrat, Fossel Pteridophytes preconstructed plants-Lepidodendron and Colomites (1888) Gymnosperms Whitai isomor

Suggested Laboratory Exercises:

- Study of external morphology, unatomy of vegetative and reproductive parts of *Psilotum Sela sinella*. Equisetum and Marsilea
- Study of external morphology, anatomy of vegetative and reproductive parts of Cycas Pints and Ephedra
- Study of fossils and stides of fossils
- · Preparation of charts of Geological time scale

35.

Note: The paper will contain nine questions having three question in each section. Candidates are required to attempt five question in all taking atleast one question from each section.

Paper-I: Palaeontology and Structural Geology Section-A

Definition, Scope, sub-division, and relationship of palaeontology with other branches.

Fossils-condition necessary for preservation, modes of preservation, uses. Elementary ideas about origin of life, evolution and fossil records.

Skeletal morphology and geological distribution of following groups

Foramanifers, Brachiopods Mollusca (Lamelibranches, Gastropods and Cephalopods Nautiloids, Ammnoids, Dibranchia), Trilobites. Echinoids, Graptoloids and Gorals.

Section-B

Gondwana Flora-morphological characters of the flora: Vertebraria, Glossopteris, Gangamopteris, Ptilophyllinn.

Unconformity-its kinds, recognition in the field and geological significance. Overlap and Offlap.

Inliers and Outliners. Basic Concept of cleavages: Lineation, Joints, Salt Domes.

Section-C

Attitude of planes (Bledding Planes) and lines. Dip (true and apparent, Strike, Pitch and Plunge. Uses of Clinometer/Bed: apparent and vertical thickness. Criteria to determine top and bottom sequence, Morphology of folds and faults, their geometric and genetic classification and recognition in the field. Elementary ideas of the mechanics of folding and faulting.

Practical

Palaeontology: Identification, description and drawing of different views of the following fossils:

Nummulites, Calymene, Paradoxide, Trinucleus, Phacops, Olenus, Olenellus, Terebratuala, Products, Spirifer, Rhynchonella, Atrypa, athyris, Lingula, Strophomena, Arca, Pecten, trigonia, Cardium, Hippurite, Venus, Lima, Inoceramus, Lopha, Gryphaea, Exogyra, Spondlylus, Trochus, Conics, Natlca, Turritella, Physa, Murex, Cyprea, Bellerophone, Naullus, Ganfatites, Ceratites,

Perisphinctes, Belemnite, Cidaris, Hemiaster, Glossopteris, Gangamopteris, Vertebraria, Ptillophylum.

Structural Geology: Study of physiographic features in topographical maps and use of clinometer compass, drawing profiles and geological section along given direction.

Simple dip and strike problems connected with three and apparent dips, true and vertical thickness and width of the outeropy by calculation and geometrical methods. 一条 的现在分词

Completion of outerops: Determination of thickness of beds; identification of structural features in hand specimens drawing of profiles and section-showing the following features Simple beds, folds, faults, unconformities, overlaps, offlaps and intrusion. Books recommended.

- Woods, H.: Ralacontology invertebrate.
- Lehmann, U., Hillmer, g. 1983; Fossil Invertebrates Gambridge University Press.
- Nield, E.W. and Tucer V.C.T., 1985; Palaeontology-An Introduction, Pergamon Press.

Paper-II : Petrology

Note: The paper will contain nine question-in-each section. Candidates are required to attempt five questions in all selecting at least one question from each section.

Section-A

Nature and composition of magmas, plutonic, hypabysal and volcanic rocks, intrusive and extrusive forms, structure and texture. Elements of classification of igneous rocks.

Crystallization of baseltic-magma, Bowen's Reaction Principle, differentiation and assimilation.

Crystallisation of unicomponent and bicomponent silicate melts. Diposide-Albite-Anorthite basalt system and variation of igneous rocks. Study of common igneous rocks-Granite, rhyolite, gabbro, basalt, Pegmatite, dolerite, syenite, diorite and peridotite.

Section-B

Process of formation of sedimentary rocks-Weathering, decomposition, disintegration, transportation and deposition. Concept of lithification and diagencals.

Sedimentary rocks-Structure, toxture, residual, mechanically transported, chemical and organic deposits. Elementary idea of sedimentary environments and provenance.

University of Rajasthan

Study of common sedimentary rocks-sandstone, limestone, shale, conglomerate and greywacke. The state of the s

Section-C

Metamorphism agents and types, Concept of grade, and facies of metamorphism, Texture, structure and classification of metamor--phic rocks. with all a

Types of metamorphism and their products, Gataclastic, thermal and regional metamorphism. Dynamothermal metamorphism of argillaccous and calcareous rocks. · the walk of the same of the same of the

Retrograde metamorphism and metasomatism; anatexis. Study of important metamorphic rock, slate, schist, gneiss, granulite, -marble.

Practical

Petrology Neaudrawing of different forms assumed by intrusive igneous rocks. Study and recording of the typical textures of plutonic, hypabyassal and volcanic rocks.

Megascopic study of the following igneous rocks: Granite, spegmatite, aplite, syenite, nepeline syenite, diorite, gabbro, norite, adunite, peridotite, basalts, obsidian, lamprophyre; phonolite and trachyte.

Microscopio study of the following rocks; Granite, syenite, diorite, gabbro, dunite, pyroxenite dolerite, rhyolite and basalt.

Sedimentary and Metamorphic rocks Study of typical textures of sedimentary and metamorphic rocks. Systematic megascopic and microscopic study of the following rocks types : Conglomerate, breccia, sandstone, arkosengreywecks, shale, limestone, slate, phyllite, schist, gneiss, marble, quartzite, migmatite and charnockite. Book Recommended

- 2. Harker, A.: Petrology, McGraw Hill Book Co. Inc. New York,
- 3. William, Turner & Gilbert, Petrogaphy CBS Publisher, Delhi.
- 4. Jackson, J. Text Book of Lithology.
- 5. Hatch & Wales, Betrology.
- 6. Smith, H.O. : Minerals & Microscope.
- 7. Kerr : Optical Wiferalogy, CBS Bublisher, Delhi.

6. MATHEMATICS

B.Sc. Part-II 2020

Teaching: 3 Hours per Week per Theory Paper.

2 Hours per Week per Batch for Practical

Examination Scheme:

	Min.Pass Marks		Max. Marks
	Science – 54 Arts – 72		150 200
Paper – I	Real Analysis	Duration 3 hrs.	Max. Marks 40 (Science) 53 (Arts)
Paper – II	Differential Equations	3 hrs.	40 (Science) 53 (Arts)
Paper – III	Numerical Analysis	3 hrs.	40 (Science) 54 (Arts)
Practical		2 hrs.	30 (Science) 40 (Arts)

Note:

- 1. Common paper will be set for both the Faculties of Social Science and Science. However, the marks obtained by the candidate in the case of Faculty of Social Science will be converted according to the ratio of the maximum marks of the papers in the two Faculties.
- 2. Each candidate is required to appear in the Practical examination to be conducted by internal and external examiners. External examiner will be appointed by the University and internal examiner will be appointed by the Principal in consultation with Local Head/Head, Department of Mathematics in the college.
- 3. An Internal/external examiner can conduct Practical Examination of not more than 100 (Hundred) Candidates.
- 4. Each candidate has to pass in Theory and Practical examinations separately.

Paper – I: Real Analysis

Teaching: 3 Hours per Week

Duration of Examination : 3 Hours

Max. Marks:

40 (Science)

53 (Arts)

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

Unit 1: Real numbers as complete ordered field, Limit point, Bolzano-Weierstrass theorem, closed and Open sets. Concept of compactness and connectedness. Heine-Borel theorem. Holder inequality & Minkowski inequality, Metric space — Definition and examples, Open and Closed sets, Interior and Closure of a set, Limit point of a set in metric space.

Unit 2: Real sequences- Limit and Convergence of a sequence, Monotonic sequences. Cauchy's sequences, Subsequences, Cauchy's general principle of convergence. Properties of continuous functions on closed intervals.

Unit 3: Properties of derivable functions, Darboux's and Rolle's theorem. Notion of limit, continuity and differentiability for functions of several variables. The directional derivative, the total derivative, expression of total derivative in terms of partial derivatives.

Unit 4: Riemann integration – Lower and Upper Riemann integrals, Riemann integrability, Mean value theorem of integral calculus, Fundamental theorem of integral calculus. Functions of bounded variations. Introduction, properties of functions of bounded variations, total variation.

Unit 5: Sequence and series of functions – Pointwise and Uniform convergence, Cauchy's criterion, Weierstrass M-test, Abel's test, Dirichlet's test for uniform convergence of series of functions, Uniform convergence and Continuity of series of functions, Term by term differentiation and integration.

Paper - II: Differential Equations

Teaching: 3 Hours per Week

Duration of Examination: 3 Hours

Max. Marks:

40 (Science)

53 (Arts)

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

Unit 1: Degree and order of a differential equation. Equations of first order and first degree. Equations in which the variables are separable. Homogeneous equations and equations reducible to homogeneous form. Linear equations and equations reducible to linear form. Exact differential equations and equations which can be made exact.

Unit 2: First order but higher degree differential equations solvable for x,y and p. Clairaut's form and singular solutions with Extraneous Loci. Linear differential equations with constant coefficients, Complimentary function and Particular integral.

Unit 3: Homogeneous linear differential equations, Simultaneous differential equations. Exact linear differential equations of nth order. Existence and uniqueness theorem.

Unit 4: Linear differential equations of second order. Linear independence of solutions. Solution by transformation of the equation by changing the dependent variable/the independent variable, Factorization of operators, Method of variation of parameters, Method of undetermined coefficients.

Unit 5: Partial differential equations of the first order. Lagrange's linear equation. Charpit's general method of solution. Homogeneous and non-homogeneous linear partial differential equations with constant coefficients. Equations reducible to equations with constant coefficients.

Reference Books:

- 1. R.S. Senger, Ordinary Differential Equations with Integration, Prayal Publ. 2000.
- 2. D.A. Murray, Introductory Course in Differential Equations, Orient Longman (India), 1967.
- 3. E.A. Codington, An Introduction to Ordinary Differential Equations, Prentice Hall of India, 1961.

Paper - III: Numerical Analysis and Vector Calculus

Teaching: 3 Hours per Week

Duration of Examination: 3 Hours

Max. Marks:

40 (Science)

54 (Arts)

Note: (i) This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

(ii) Non-Programmable Scientific Calculators are allowed.

Unit 1: Differences. Relation between differences and derivatives. Differences of a polynomial. Newton's formulae for forward and backward interpolation. Divided differences. Newton's divided difference, Lagrange's interpolation formula.

Unit 2: Central differences. Gauss's, Stirling's and Bessel's interpolation formulae. Numerical Differentiation. Derivatives from interpolation formulae. Numerical integration, Derivations of general quadrature formulas, Trapazoidal rule. Simpson's one-third, Simpson's three-eighth and Gauss's quadrature formulae.

Unit 3: Relation between the roots and coefficients of general polynomial equation in one variable, transformation of equations, Descarte's rule of signs, solution of cubic equations by Cardon's method, biquadratic equations by Ferari's method.

Numerical solution of Algebraic and Transcendental equations, Bisection method, Secant method, Regula-Falsi method, Iteration method, Newton- Raphson Method (derivation of formulae and rate of convergence only).

Unit 4: Gauss elimination and Iterative methods (Jacobi and Gauss Seidal) for solving system of linear algebraic equations. Partial Pivoting method, ill conditioned systems, Numerical solutions of ordinary differential equations of first order with initial condition using Picard's, Euler and modified Euler's method.

Unit 5: Scalar and Vector point functions. Differentiation and integration of vector point functions. Directional derivative. Differential operators. Gradient, Divergence and Curl. Theorems of Gauss, Green, Stokes (without proof) and problems based on these theorems.

Reference Books:

- 3. C.F. Gerald, P.O. Wheatley, Applied Numerical Analysis, Addison-Wesley, 1998.

Practical

Teaching: 2 hours per week per batch not more than 20 students.

Examination Scheme:	Duration: 2 Hours		
	Science	Arts	
Max.Marks	30	40	
Min.Pass Marks	11	15	
Distribution of Marks:			

Two Practicals one from each group

10 Marks each	=	20 Marks	(13 Marks each) 26
Practical Record	==	05 Marks	07
Viva-voce	=	05 Marks	07
Total Marks	=	30 Marks	40

The paper will contain TWO practical. The candidates are required to attempt both practical.

Practicals with Computer Programming in C Language.

Programming languages and problem solving on computers, Algorithm, Flow chart, Programming in C- Constants, Variables, Arithmetic and logical expressions, Input-Output, Conditional statements, Implementing loops in Programs, Defining and manipulation arrays and functions.

Group A:

- 1. Printing n terms of Fibonacci sequence.
- 2. Finding n!, $\sum n$, $\sum n^2$ etc.
- 3. Defining a function and finding sum of n terms of a series/sequence whose general term is given (e.g. $a_n = \frac{n^2+3}{n+1}$).
- 4. Printing Pascal's triangle.
- 5. Finding gcd and lcm of two numbers by Euclid's algorithm.
- 6. Checking prime/composite number.
- 7. Finding number of primes less than $n, n \in \mathbb{Z}$.
- 8. Finding mean, standard deviation and ${}^{n}P_{r}$, ${}^{n}C_{r}$ for different n and r.

Group B:

1. Numerical integration using Trapezoidal, Simpson's 1/3, 3/8 and Waddle rules.

Note:

- 1. Each Candidate (Regular/non-Collegiate) has to prepare his/her practical record.
- 2. Each Candidate has to pass in Practical and Theory examinations separately.

7. Economics

B.Sc. Part-II 2020

Scheme:	Min. Pass Marks	Max. Marks
Arts	72	200
Science	54	150

Each paper shall be of three hour duration and of 100 marks for Arts students and of 75 marks for Science students.

Paper – I Introductory Macro Economics

Paper – II (a) Elements of Statistics and Mathematics

(b) History of Economic Thought

Note: There will be two papers of Economics. Each paper shall consist of three parts. Part A shall contain question No I consisting of very short type X (Ten) questions. The candidate is required to answer each question in 20 words. Part B shall contain question No 2 consisting of V (five) question. The candidate is required to answer each question in 100 words. Part C shall contain three essay type questions (one from each section) with internal choice.

A candidate will be required to attempt five questions in all. All questions of Part A and Part B are compulsory while rest 3 questions are to be attempted from parts C selecting one question from each section. All questions carry equal marks. Each question will carry 20 marks for Arts students and 15 marks for Science students.

Paper-I

Introductory Macro Economics

Section- A

Macroeconomics, Meaning, Subject matter and Importance. Basic tenets of Classical, Keynesian, New-Classical and New –Keynesian economics, Macrocosmic variables, Circular flow of Income, National Income: Basic concepts, Measurement, Sectoral Accounts, Nominal and Real Aggregates.

Money function. Demand and Supply Quantity Theory of Money Transaction Approach. Cash Balance Approach. Keynes reformulation of the Quantity Theory of Money inflation Meaning and Impact. Theories of Inflation-Demand Pull (Keynesian and modern), Demand Push. Structural Theories of Inflation.

Section-B

Income and Employment Determination: Classical Modal and Keynesian Model, Consumption Function: Psychological Law of Consumption, Determinants of Consumption, Paradox of, Thrift, Investment Function: Determinants of investment, Marginal Efficiency of Capital and Marginal Efficiency of Investment, Concept of Multiplier and Accelerator.

Section-C

Central Bank: Organizational set-up and functions of Central Bank (with special reference to RBI). Commercial Bank: Functions, Modern trends of Commercial Banking. Quantitative and Qualitative Credit control by RBI. Money Supply: Meaning & Definition, four measures (M₁ M₂ M₃ and M₄) Monetary Policy: Objectives, Targets and Indicators, Transmission Mechanism.

Recommended Books:

- 1. G.S. Gupta Macro Economics, Theory and Application, 4th Ed, McGraw Hill, New Delhi.
- 2. Dornbusch, Fisher and Startz: Macroeconomics, XI Edition, Indian Reprint, Tata McGraw-Hill, Publishing Company Ltd. New Delhi.
- 3. N. Gregory Mankiw, Macroeconomics, Worth Publishers (Latest Edition).
- 4. H.L. Ahuja. (Hindi and English edition) Macro Economics, Theory and Policy; S. Chand & Co. Ltd, New Delhi.
- 5. Suraj B. Gupta: Monetary Economics, S. Chand and Co. Ltd.
- 6. L.N. Nathuranmka, Prarambhik Samashti Arthshastra, Ramesh Book Publishing House, Jaipur
- 7. Rana and Verma: Macroeconomic Analysis, Vishal Publications,
- 8. Richard T. Froyen, Macroeconomics, Theories and policies, (X Edition), Adapted by Pearson Education.

Paper -II (a): Elements of statistics and Mathematics

Duration: 3 hrs Max Marks: 100

Section- A

Surds, Indices, Quadratic Equation, Logarithms, Permutation and Combination, Binomial Theorem, Arithmetic progression, Geometric Progression and Harmonic Progression, Analytical Geometry: Straight Line, Parabola and Hyperbola, Matrices and Determinants, solution of Simultaneous equations by Cramer's rule and Matrix Inverse. Simple differentiation, Partial differentiation (involving two independent variables). Maxima, minima point of inflexion. Simple Integration involving one independent variable, Application in Economics (Elasticity, Average, Marginal Concepts)

Section - B

Statistics-definition, nature and importance, Uses and relevance of statistical methods, Census and Sample survey, Methods of data collection and tabulation, Diagrammatic and Graphical representation of data; Measures of Central Tendency: Arithmetic Mean, Mode, Median, Geometric Mean, Harmonic Mean. Concept and Measures of Dispersion and Skewness.

Section – C

Simple Correlation: karl Pearson's and Rank Correlation, Regression analysis, Fitting of Linear Regression lines using Least Square Method, Analysis of Time Series, Determination of trend by straight line trend equation, Index numbers, Interpolation (Binomial Expansion and Newton's method), Association of Attributes.

(Note: Use of non-programmable calculator is permitted)

Books Recommended:

Paper- II (b) History of Economic Thought

Section -A

Mercantilism Views on Trade Money, Prices. Wages and Employment Physiocracy:Natutal Order. Primacy of Agriculture. Net Product and Circulation of Wealth. Theory of taxation and role of government. Classical School: Adam Smith. Views on Division of Labour. Theory of Value, Capital accumulation Distribution, International trade, Economic Development Critiques of Adam Smith T.R. Malthus . Theory of Population . Theory of gluts. David Ricardo. Theory of Valve and Distribution. Foreign Trade, Economic Development and Theory of Rent

Section-B

Critities of the Classical School - Sismondi. Robert Owen, Friedrich List.

J.S. Mill theory of value. Views on Production and Distribution Karl Marx: Efforts at Scientific Socialism Theory of Money Labor Theory of Value, Theory of Capital Accumulation and crisis Distribution. German Historical School and the Development of Marginalism. Neo-classical School: Marshall-Price Determination and Elasticity. Consumer Surplus costs: Economics Rent and Profit

Section C

Economic of Kautilya, Economic thought of Dadabhai Naroji, Mahatma Gandhi, G.K. Mehta, Deendayal Upadhayaya.

Books Recommended:

- 1. Louise Haney, History of Economic Thought, Surjit Publication, New Delhi
- 2. Enc Roll: History of Economic Thought, Faber and Faber (Rupa)

B. Geography

Scheme of Examination

Faculty	Min. Pass Marks	Max. Marks
Arts/Social Science	72	200
Science	54	150
Paper I	Resources Geography	Arts 75
•		Science 50
Paper II	Human Geography	Arts 75
		Science 50
Practical	18	Arts 50
		Science 50

Notes

- 1. Students are permitted to use the stencils, simple calculator and log tables wherever needed in both theory and practical examinations.
- 2. There will be a common paper for Arts and Science.
- 3 Q.1 will be compulsory and will cover the entire course of the paper.
 - Q No. 1 of 20% marks of the maximum marks be set in two parts
 - (a) Part (a) will have ten items for locating on a map (to be supplied by examination centre) carrying 10% marks of the maximum marks and candidates shall attempt any five items.
 - (b) Part (b) will have 10 short answer questions carrying 10% marks of the maximum of marks and candidates shall attempt any five items.
- Remaining 9 questions carrying equal marks will be set with three questions from each section of the syllabus.
- Candidate will attempt 5 questions in all including question No. 1 selecting at least one question from each section.
- 6. Practical examination will be conducted by the board of examiners.
- 7. The candidate will have to pass in theory and practical separately.
- 8. The non-collegiate candidates will have to attend a practical training camp of 48 hours at a college affiliated to the University of Rajasthan, Jaipur notified by the University from time to time in which Geography subject is taught on payment of fee fixed by the University. The candidates appearing at examination from any examination centre located in Jaipur City will attend the practical camp at the University Post Graduate Department on payment of fee fixed by the University The candidate will procure Certificate of successful completion of practical training camp from the College/Department of Geography and produce the same at the time of practical examinations.

· Paper I: Resources Geography

Section A

Nature, scope and significance of resources geography, definition and classification of resources: renewable and non renewable resources, resource classification of Zimmerman. Natural Resources: Distribution, exploitation, uses and conservation of forest, water, soils, fisheries, traineral resources, energy resources (coal, petroleum, natural gas and non-conventional energy resources).

Section B

Human resources: Population growth, distribution and density, causes of inequalities, population-resources relationship and problems, Agricultural resources: fisheries and cereal crops: rice, wheat, maize and barley; beverages: tea, coffee and tobacco, commercial crops: cotton, rubber, jute, sugarcane, silk and artificial fibres. Agricultural regions of the world.

Section C

Concepts of Resources utilization, their conservation, environmental and cultural constraints in resource utilization, water conservation and rainwater harvesting, soil and forest resources conservation, land capability classes, resources regions of the world, resources regions of the ladia, economic regions of the India, sustainable development.

Recommended Readings:

Robinson, G.W. 1932: Soils, their Origin, Constitution and Classification. London.

Shafi, M. 2004: Agricultural Geography. Pearson India.

Paper II: Human Geography

Section A

Definition, aims and scope of human geography, relation of human geography with other social sciences. Principles of human geography, essential faces of human geography.

according to Brunhes and Huntington, schools of man-environment relations: determinism possibilism and neo determinism.

Section B

Human races: evolution and migration, zone-strata theory, classification of races: type-characteristics and distribution, human races in India, tribes of the world: eskimos, bushman, pigmy, masai, badduich and khirgiz; tribes in India; bhils, nagas, santhal, gond, gujjar of Japana and Kashmir and toda. Population growth and theories, distribution and density of world population.

Section C

Migration of population: causes, types and impact; population regions and population policies in India. Rural settlements: factors affecting development of rural settlement, types and patterns of rural settlements, building materials and house types, urban settlements: process of urbanization, urban problems in India, impact of human activities on environment.

Practicals

Scheme of examination

Min. Pass Marks: 18		Max. Marks: 50
	Bifurcation of Marks	Tinte
Written test	24	3 hrs.
Field survey and viva voce	10.04	2th hre.
Record and viva voce	$08 \cdot 04$	•

N.B.I. There shall be 6 questions in written paper selecting at least two questions from each section. Candidates are required to attempt 3 questions selecting I question from each section. All question carry equal marks

Section A

Definition of cartography, types of cartographic symbols and their uses, drawing instruments and materials, classification and representation of data with the help of squares, rectangles, eintest spheres, ring, pyramids, wheel diagrams, traffic flow diagram, isochronic chart.

Section B

Classification and uses of maps, drawing of isopleth, choropleth, chorochromatic, choroschematic and dot maps (simple, multiple and multi colour), measures of central tendency and dispersion: mean, median, mode, quartiles, standard deviation.

Section C

Elements of map reading. History of topographical maps in India. Scheme of topographical mapping in India as per National Map Policy, 2005. Conventional symbols and interpretation of physical and cultural features on topographical maps.

Prismatic Compass survey: equipments, methods of measurement of bearings, correction of bearings, record of survey closing error and its corrections.

A REFER

In each Question paper, 10 (ten) questions will be set having 2 (Two) from each unit. Candidates have to answer five questions in all, taking not more than one from each unit.

Paper I (Statistical Inference)

Unit-I

Sampling from adistribution. Concept of statistic and its sampling distributions ampling distribution for mean of Binomial. Poisson and Normal Distribution Chiesquare Distribution. Definition, Moments, MGF, moments, C. G.F., Mode & Skewness, Limiting and Additive Property. Distribution of ratio of chiesquare variates. Applications. Testing Normal Ropulation variance, Test for Goodness of fit, Contingency table & Independence of attributes; Yate's correction.

Unit-II

t-Distribution: Definition of Student's -t & Fisher's -t Statistic and derivations of their distributions. Constants & Limiting Property of Indistribution. Applications Testing of Single mean, Difference of the means; paired t-test and sample correlation coefficient. For Distribution: Definition, Derivation, Constants, Application—Testing of equality of two variances. Relationship between t, F and chi-square Distributions.

Unit-III

Theory of Estimation: Point Estimation Goncept and Problem for Point Estimation; Seritorion of a good estimator (Unbiasedness, Methods of Maximum likelihood, Consistency, Efficiency, Sufficiency). MVUE. Method of moments. Interval Estimation-Concept, Confidence Interval, Confidence Coefficient, Construction of Confidence Interval for Population Mean, Variance, Difference of Population Means & Ratio of Variances for Normal Distributions.

Unit-IY

Testing of Hypothesis: Simple, Composite, Null and Alternative Hypothesis. Types of error, Critical region. BCR, Neyman-Person's Lemma for BCR, BCR in case of Binomial, Poisson, and Normal and Exponential Population.

18 hours

Syllabus: R.Sc. Part-II

四級對意外 等点

Unit-V

Large sample tests-Testing of single mean, proportion. Testing of difference of means and proportions. Non-Parametric Tests

Definition, Merits & Limitations. Sign test for one sample and two sample cases, Run Test, Median test.

Unit-V

Statistical Quality Controls Concept of SQC, Process control & Alecder control. Causes of availations in quality Alecteral theory of a control charts, control limits, subgrouping a Summary of our of control charts for and control charts for and control charts for charts. Concepts of Defects and Defectives. Control Charts for attributes: Construction of probart, pechart, exchart and their merits and demerits.

Raper III

Bractical Paper

- 1. Tests of significance based on it, Chiesquare, F. Testing of significance of sample correlation coefficient. Use of Z-transformation.
- 2. Large sample tests for means and proportions. Tests of goodness of fit and independence of attributes in contingency tables.
- 3. Non parametric tests: Sign, Run, Median (for large samples)
- 4. Computation of mortality and fertility rates. Construction of life
- 5. Construction of Index-Numbers by Laspeyre's, Paische's, Fishers's, Chaim Base Indiges. Consumer-price index-
- 6. Tests for index numbers.
- 7. Determination of trends in a time-series and constitution of seasonal indices.
- 8. Drawing of \overline{X} , R np. p and C-Gharts.

10. APPLIED STATISTICS
Marks Scheme

Arts	65 marks	65 marke		70 marks
Science	50 mérk	50 mark		SO mark
Stat	apper II Challetter	Company Applications in	Dressy and	uo posed manage
	ture Science	Statistical Inference 50 mark	Statistical Inference 50 mark I Statistical Applications in 50 mark	Statistical inference Statistical Applications in Society and Industry

Paper I, II

Total 150

In each Question paper, 10 (ten) questions will be set having 2 (Two) from each unit. Candidates have to answer five questions in all, taking not more than one from each unit

Statistical Inference Unit-I

Sampling from a distribution : Concept of statistic and its same pling distribution. Sampling distributions for mean of Binomial, Poisson and Normal Distribution. Chi-square Distribution Definition, MGF, moments, C.G.F., Mode & Skewness and other properties (without proof). Applications: Testing Normal Ropulation variance, Tests for Goodness of fit, Contingency Fable & Independence of attributes, 18 hours

Unit-II

t-Distribution : Definition of Student s.-t & Fisher's -t Statistic. Property and Applications of tedistribution for testing-Single mean, difference of two means, observed sample correlation coefficient Paired t-test, E-Distribution : Definition, Mean, Variance & mode, Application of F distribution- Testing of equality of two variances. Relationship between t, F and chi-square Distributions: (without proof) 18 hours

Unit-III

Theory of Estimation: Point Estimation Problems for Point Estimation; Guiterion of a good estimator (Unbiasedness, Consistency, Efficiency, Sufficiency) MVUE Method of moments and Methods of Maximum likelihood Interval Estimation Confidence Interval for mean, variance difference of means and ratio of variances for normal Unit-IV

Testing of Hypothesis: Simple, Composite, Null and Alternative Hypothesis. Types of error, Critical region. BCR, Neyman-Person's Lemma (statement only) and its application. BCR in case of Binomial, Poisson, and Normal Population. 18 hours Unit-Y

Large sample test-Testing of single mean, proportion. Testing of difference of means and proportions. Non-Parametric Tests-Definition, Merits & Limitations, Sign test (for one sample and two sample

Paper II

STATISTICAL APPRICATIONS IN SOCIETY AND INDUSTRY (Course contents are same as that of subject statistics.)

-Unit-I

Demographic Methods Sources of demographic data census, register, adhocsungey bospital records, demographic profiles of Indiancensus. Measurement of mortality-Crude death rates, Infant mortality rates, Death rate by causo, Standardized death rate. Complete life table-Construction and its main features, Mortality rate and probability of dying. Relation between different columns of life table, uses of life table and its limitations. Measurement of fertility: Enide birth rate, General fertility rate, Specific fertility rate, Total fertility rate, Gross Reproduction Rate, Net Reproduction Rate. 18 hours

Unit-II

Economic Statistics: Index numbers-Definition, Applications of index numbers, Price relatives, Quantity & Value relatives, Link and Chain Relatives, Problems involved in computation of index number. Use of averages, Simple aggregative and Weighted average

University of Rajasthan

methods. Laspeyre's Paasche's and Fisher's index number. Tests for index numbers. Consumer price index. 18 hours

Unit-III

Time Series Analysis: Definition and its different components, illustrations, additive and multiplicative models. Different Methods for determination of trend & seasonal fluctuation along with their merits * & demerits. 18 hours

Unit-IV

Educational Statistics Methods of standardization of scales and etests, Zescores, tescores, Standardyscores, Percentific scores, Intelligence and account of the second sec agence Quotient and its measurement and uses. Validity of test scores. Reliability of Test Scores and the indetermination 18 hours

Unit-V

Statistical Quality Control: Conception SQC, Processic introl & Product control. Gauses of variation inequality, General theory of control charts, control limits, sub-grouping, Summary of out-of control criteria. Control charts for vatiables. Construction of Mean and Range charts. Concept of Defectives. Control Charts for attributes: Construction of appelant, pechart, c-chartrand their merits 18 hours

PAPER III Practical Paper

(Gourse contents are same as that of subject statistics)

- 1. Tests of significance based on t, Chi-square, F. Testing of significance of sample correlation coefficient mation
- 2. Largo sample tests for means and proportions. Tests of goodness of fit and independence of attributes in contingency tables.
- 3. Non-parametricatests: Signy-Runa Median (for large samples)
- 4. Computation of mortality and fertility rates. Construction of life table.
- 5. Construction of Index Numbers by Laspeyre's, Paasche's, Fishers's, Chain Base Indices. Consumer price index.
- 6. Tests for Index numbers.
- 7. Determination of trend in a time series and construction of seasonal indices.
- 8. Drawing of X, R, np, p and C-Charts.

11. PSYCHOLOGY

B.A. /B.Sc. Pass Course Part-II

SCHEME OF EXAMINATION:

Faculty			Max. M	ark	s	Min. Passing Marks		
	Arts		2	00		72 (Th.54	Pr.18)	
	Science		1	50		54 (Th.36	Pr.18)	
Paper		Nome	nclature		Duration	Max	. Marks	
				-		Arts	Science	
I		Abnormal	Psychology		3 Hrs.	75	50	
II		Psycholog	ical Statistics	\dagger	3 Hrs.	75	50	
		Pra	ctical	-	3 Hrs.	50	50	

NOTE:-

- 1. There will be three papers in Psychology. Each paper will be of 3 hours. There will be a common paper for Arts and Science. In I and II Papers there will be 3 Sections A, B and C and will cover the entire course content of the paper.
- Section-A Will contain 10 questions of 20 words each. Each question will be of 1.5 marks for Arts students and 1 mark for Science students. Thus, Part-A will be of 15 marks for Arts students and of 10 marks for Science students.
- Section-B Will contain 7 questions of 50 words each, out of which students are required to attempt 5 questions. Each question will be of 3 marks for Arts students and of 2 marks for Science students. Thus, Part-B will be of 15 marks for Arts student and of 10 marks for Science students.
- Section-C Will contain 3 long questions each with internal choice. Each question will be of 15 marks for Arts students and 10 marks for Science students. Thus, Part-C will be of 45 marks for Arts students and 30 marks for Science students.

For clarification the distribution of marks is tabulated as below:-

	ARTS		
Section	No. of Questions	Marks	Total
A	10	1.5	15
В	5 (Out of 7)	03	15
C	3 (with internal choice)	15	45
		Total Marks	75
	SCIENCE		
Section	No. of Questions	Marks	Tota
A	10	01	10
В	5 (Out of 7)	02	10
С	3 (with internal choice)	10	30
		Total Marks	50

2. Use of simple calculator will be allowed for statistical portions of all papers.

	Paper I - Abnormal Psychology
	Section: A
1.	Mental Disorder: Definition, Indicators of Abnormality, DS M - 5 and ICD - 10
	Classification Systems, Mental Health Professionals.
2 .	Causal Factors and View points: Risk Factors and Causes; Necessary, Sufficient
	and Contributory causes; Diathesis - Stress Models, Biological, Psychological
	and Social perspectives.
3.	Clinical Assessment and Diagnosis: Basic elements in Assessment, Physical and Psychosocial Assessment.

	Section: B
4.	Anxiety, Obsession Compulsion and Trauma and Stress or Related Disorders:
	Types, Clinical Picture and Causal Factors.
5 .	Mood Disorders and Suicide: Types, Clinical Picture and Causal Fact ors.

6 . Somatic Symptoms and Dissociative Disorders : Types, Clinical Picture and Causal Factors

Section: C

Books Recommended:

- Butcher, J. N., Hooley, J.M. & Mineka, S. (2017). Abnormal Psychology.
 Noida:
 - Pearson India Education.
- Oltmanns, T. F. & Emery, R. E. (2017). Abnormal Psychology. Noida: Pearson India Education.
- David, B. H. & Durand V. M. (2007). Abnormal Psychology: An Integrated Approach. New Delhi: Thomson.
- · Ray, W. J. (2015). Abnormal Psychology. New Delhi: Sage.

Paper II - Psychological Statistics

Section-A

- Introduction: Nature and Scope of Statistics and Psychological Data; Application of Statistics in Psychology; Nature and Levels of Measurement - Categorical and Continuous Variables.
- 2. Frequency Distribution: Drawing of Frequency Distribution. Bivariate Frequency Distribution, Graphical Representation of Grouped Data-Histogram, Polygon.
- 3. Measurement of Central Tendency: Purpose and Types; Characteristics and Computation of Mean, Median and Mode.

Section-B

- 4. Measures of Variability: Concept and Uses; Characteristics and Computation of Range, Quartile Deviation, Average Deviation and Standard Deviation.
- Correlation: Concept and Types- Pearson's Product Moment Correlation (for Ungrouped Data by Assumed Mean and Actual Mean); Spearman's Rank Order Correlation.
- 6. Hypothesis Testing and Inferences Making: Population and Sample, Types of Sampling, Standard error of Mean, 't' test (Independent group), Interpretation of 't' values, levels of Significance.

Section-C

- 7. Non Parametric Tests: Nature and Assumptions of Distribution-free Statistics; Chi-Square; Equal Probability, 2 x 2 Contingency Table; Median Tests.
- 8. ANOVA: Purpose and Assumptions of ANOVA. One way ANOVA
- 9. Computer Analysis: Preparation of Data, Uses of SPSS.

Books Recommended:

- Broota K.D. (1992): Experimental design in behavioural research. New Delhi: Wiley Eastern.
- Garrett, H. (1981). Statistics in psychology and education. Mumbai: Vakil Febber and Simons.
- Mininum, E.W., King, B.M. & Bear. G. (1993). Statistical Reasoning in Psychology and Education. New York: John Wiley.
- Siegel. S. (1994). Non-parametric Statistics. New York: McGraw Hill.

Practical

- 1. Assessment of Mental Health
- 2. Assessment of State and Trait Anxiety
- 3. Measurement of Depression
- 4. Measurement of Coping Styles
- 5. Assessment of Family Pathology
- 6. Word Association Test
- 7. Eight-State Questionnaire
- 8. Neuropsychological Assessment
- 9. Stress: Measurement and Analysis of Group Data (Mean and Median)
- 10. Stress: Measurement and Analysis of Group Data ('t' test)

and the second second

Five questions are to be set taking one from each unit. (each question will have an internal choice). Student will attempt all the five questions: 40% weightage will be given to WATER BUT THE THEFT

Unit-1

3

Q-point, Stability of Q point. Various Transiston biasing circuits; Thermal bias stability: Arramplifier will feedback gain; Stabilization. Reduction of non-linear distoftion by negative feed back. Effect of feedback on input and output impedances at a second second

Unit-2

Frequency response of linear amplifiers and noise distortion, current and voltage, series and parallel feed back. Examine the property of the series and parallel feed back. ples of positive and negative feedback; Bmittersfollower Difference and the second second positive and the second positive and ferential amplifiers with balanced, unbalanced single input and double input (DC and AC analysis) - common mode rejection

Unit-3

Operational amplifiers, Differential amplifier, operational amplifiers as an integrator, differentiator, inverting amplifier, adder and subtractor amplifier, voltage comparator and logarithmic amplifier, Ideal and practical operational amplifier for offsets, input offset current and voltage, power supply-using 741 operational amplifier, uses of operational amplifier asses

Unit-4

Class A, Band C operating conditions for powersamplificers, conditions of maximum powerstransfer, special features of transistors used if or power amplification. Need of impedence matching in power amplifier, shunt feed power amplifier of transistors.

ciency, Distortion power dissipation and power amplification, aphase inverters of push-pull amplifier. Class AyAB shubblings applifier using transistors.

Unit-5

Problems in amplifier circuit elements at high frequency,
Equivalent circuit, wide band amplifiers. High and lowelfe.

quency compensation, pulse response and testing of an amplifier.

fier. Tuned amplifiers (single and double tuned) and heir uses

ask F amplification in radio and TV receivers (No mathematical derivations, only qualitative description)

Paper-II- Rectifiers and Oscillators

wikiam whorkers 3

"Fime : Hours

JA 5 19 50

Five questions are to be set taking one from each unit (each)
question will have internal choice). Student will after problems and the management of the problems and the problems are the problems and the problems and the problems are the problems and the problems are the problems and the problems are the problems are the problems and the problems are the proble

Unit-1

Half wave, Full wave and bridge rectifiers, Definition of cipple factor. Efficiency, voltage regulation, smoothing filters, L-section and π - section filters and their caseading, Filter efficiency, Metal rectifiers, common power supply, voltage regulation and V.R. tubes.

Unit-2

Zener diode Electronically regulated power supply, voltage was multipilers, Froubleain-low and high voltage power supply.

Barkhausent Criterion for maintained oscillations, grid 5iasing and self-sustained oscillations, Tuned grid, Funed emitters oscillator (Wainly transistor type), crystal control of oscillators, R-C phase shift oscillators, Designing, Considerations of the Harteley and Well-bridge oscillators.

326

Unit-3

Bistable multivibrator, Monostable and Bistable multivibrator (Collector coupled), Improvement of multivibrator response, synchronization Triggering in relaxation oscillators.

Unit-4

Response of sinusoidal, Triangular and Rectangular waves to CR and LR circuits. Their uses as integrating and different tiating circuits.

Non-linear wave shapping circuits, Clipping and climping circuits, slicer, limiter circuits, Limiting and clipping amplified; peaping circuits.

Unit-5

Terminology used to describe sweep generator, Fundamental sweep voltage generator, Transistor constant current sweep generator.

(each question will have an internal choice) Studen will at tempteal the five questions. 40% weightage will be given to problems and numericals.

Unit-1

Variable resister network. Binary ladder, D/A Converter,

A/D converter, simultaneous conversion, A/D converter-counter-method, electromechanical A/D conversion, D/A and A/D conversion controls. Block diagram of a general purpose computer organization and control.

Unit-2

Central Processing Unit, I/O units, Arithmetic fogic unit,
Internal storage, Auxiliary storges like HDD, PDD, CD etc.
Read only memory, Random Access Memory. Computer generations and classification.

機能が必要

A STATE OF THE STATE OF

Unit-3

Alogrithm-Definition and properties of alogrithms flow chart, symbols of flow chart, converting a flow chart into a high level language. Examples of simple alogrithms kowslevel language viz. machine language, assembly language, high-level language like BASIC.

Unit-4

ables, arithmatic operators, expressions and functions, character string constrants and variables string operator, expressions and functions. Terminal features system commands and editions, REM, RPHFFOUTERS statements.

Elementary BASIC programmes for numeric and string

Unit-5

Flow of control, unconditional and conditional branching, relational logic operators, two ways and emitter way selections statements; nesting repetition statements.

Definite and indefinite loops, subscripted variables. Vectors and arrays, simple programme exercises. Function definition and invocation. Subroutine, modular programmes; entering
and exiting subroutine. Files, random and sequential files. Sim-

Experiments for Practical work

Note:

死

A candidate has to perform at least sixteen experiments in all taking eight experiments from each section 'A' and 'B'.

University of Rajasthan

In practical examination the candidate will be required to perform two experiments: one from section A and the other from section B The distribution of marks will be as follows-

fime duration - 5.00 Hrs. Expts (two) - 30 (15 for each expt) marks

-Viva-Voce - 10 marks

Practical record - 10 marks

Total- 50 marks

Construction of the section of

Section-A

- 1. Fo study high pass frequency filter.
- 2. To study low pass frequency filter.
- 3. To study RC differentiating circuit.
- 4. Forstudy RC integrating circuit.
- 15. Wo study bridge rectifier with Lie rafilter.
- 6. To study transistor biosing circuits.
- 7. Study of counters and shift registors.
- The state of the s 8. To study bistable multivibrator (collector coupled)
 - 9. To study Exclusive OR (XOR) gate and verify its fully table.
- Solution of simple equations using analog computer.

Section-B

- To study analog to digital convertor circuit.
- To study digital to analog convertor circuit.

Syllabus : B.Sc. Part-11 .

To study negative feed back amplifieds

1. To study triode value characteristics and calculate-its pa-

5. To study OP Amp as summing amplifier.

6. To study OP Amp as an inverter.

7. To study OP Amp as a non-invertor.

8. To study push-pull amplifier using rapsistor.

9. To study emitter follower and its frequency response.

13. Textile Craft

B.Sc. Part-II 2020

SCHEME: B.A/B.Com/B.Sc. PART-II

1.	Theory:	Paper-I	Duration 3Hrs	Max mark 30	Min mark 22
2.	Practical:	Paper-II Paper-I	3 Hrs 3Hrs	30 35	
2		Paper-II	3 Hrs	35	25
3.	Submission	Paper-I Paper-II		35 35	25 .

Paper-I: _Weaving Theory-I

UNIT-I

Yarn numbering system -Indirect (cotton, metric, woollen and worsted count) and Direct (Tex and Denier)

Yarn Twist and their types, Balance of fabric

Methods of fabric construction: Braiding &Lacing, knitting, felting and weaving

UNIT-II

Types of loom- Shuttle & Shuttle less; introduction to shuttleless looms- airjet, waterjet, projectile and rapier loom

Preparation of Warp and West for weaving

Draft, Peg plan, Weave, Repeat, Design

UNIT-III

Derivatives of Plain weave- Rib and Basket Derivative of twill weave- Regular, Irregular, Left hand, Right hand, Pointed and curved twill Fabric defects, Selvedge, Types of Selvedge's

Paper-II: Dyeing Theory -I

UNIT-I

Difference between dyeing and printing
Mechanical finishes- basic process of beating, singeing, napping, calendaring and embossing.

UNIT-II

Stages of Dyeing (fibre, yarn & fabric) Wool dyeing and silk dyeing Dyeing machines- Jigger and Winch dyeing machine

UNIT-III

Steps of printing- preparation of cloth & colour Methods of Direct printing- Block & Roller printing Thickeners and types of thickeners

Practical (Paper-I)

- 1. Thread count and Balance of the cloth
- 2. Weave samples of derivatives of plain and twill weave

Practical (Paper-II)

- 1. Introduction to motif, repeat and layout
- 2. Block printing- samples preparation
- 3. Batik-spot, crack, scratch and painting (samples)

Submission (Paper-I)

- 1. Assessment of samples
- 2. Preparation of weave samples

Submission (Paper-II)

- 1. Any one article using block
- 2. Any one article using batik

Examination Scheme:

One Major Problem: 20 Marks One Minor Problem: 15 Marks

14. Garment Production & Export Management B.Sc. Part-II 2020

B.A/B.Com.- Maxmium Marks 40

Hrs.3

B.Sc. Maxmium Marks 50

THEORY PAPER - 1

Fashion and Apparel Design

OBJECTIVES: -

- 1. To Develop Sensitivity & Understanding towards Historical World Costumes.
- 2. To Focus on Design Elements & Principles and their Details on Garments.
- 3. To Create Awareness About the Techniques of Pattern Making & Principle of Fittings.

SECTION -A

TRADITIONAL COSTUMES

- 1. Study of traditional costumes of various regions of India.
- 2. History of costumes of Indian civilization.
- 3. Brief knowledge of world costumes; French, German, Greek, European

SECTION -B

TECHNIQUES IN PATTERN MAKING

- 4. Eight head theory principles and advantages.
- 5. Pattern making techniques- drafting, draping, flat pattern.
- 6. Colour and colour schemes, psychological effects of colour on clothes.
- 7. Fitting principles of fitting, factors to be considerd while fitting, common fitting problems, remedying fitting defects of bodice, sleeves, and skirts.

SECTION – C DESIGN

- 8. Classification of design structural and decorative
- 9. Elements and principles of design.
- 10. Layout of design of fabric in cutting floral, checks, plaids, lines.

THEORY PAPER – 11

ELEMENTS OF MARKETING AND FINANCE

B.A./B.Com.-Maxmium Marks 40

Hrs. – 3

B.Sc. – Maxmium Marks 50

OBJECTIVES:

- To create awareness about the procedures to select, proceed & start the Small Scale Industry.
- 2. To guide the process of product development according to the market needs.
- 3. To become familiar with the methods of payment in foreign trades & about types or bills.

SECTION A

- 1. Market structure- Types of market, market survey, elements of cost.
- 2. History of readymade garment industry, Problem and prospects in global market
- 3. Branded versus non -branded market.
- 4. Types of garments exported.

SECTION B

- 5. Elementary knowledge of working capital factors affecting working capital, operating cycle.
- 6. Sources of finance.
- 7. Letter of credit
- 8. Methods of payment in foreign trade
- Various typed of bills.
- 10. Insurance

SECTION C

Brief study of;

- 11. ECGC (export credit and guarantee corporation)
- 12. EIC (export inspection council)
- 13. IIP (Indian institute of packaging)
- 14. ICA (Indian of arbitration)

PRACTICAL- 1 APPAREL DESIGNING

B.A/B.Com.-Maxmium Marks 60

Hrs.-4

B.Sc. - Maxmium Marks 25

OBJECTIVES:

To familiarize with basics of color

To develop expertise in drawing croquis and draping dresses on them.

Contents:

- 1. Colour wheel and colour scheme.
- 2. Introduction to eight head theory and stick figure 9.5", 10.5".
- 3. Developing an adult croquis from block figure.
- 4. Draping of garments on croquis (at least 8 sheets) using different colours schemes and occasions.
- 5. Preparation of a portfolio.

Examination Scheme:

B.A.\B.COM:-Max Marks:-60

B.SC:-Max Marks:-25

1. Major Problems-30

1. Major Problem:-10

2. Minor Problems:-20

2. Minor Problems:-10

Internal:-5

PRACTICAL - II

CLOTHING CONSTRUCTION

B.A./B.Com.-Maxmium Marks 60

Hrs-4

B.Sc. - Maxmium Marks - 25

OBJECTIVES:

- 1. To be able to make basic drafts of bodice, sleeve and collar.
- 2. To learn the knowhow of stitching and all basic processes and ornamentation techniques.

Contents:

- 1. Pattern making
 - 1. Child basic block and sleeve block.
 - 2. Sleeve variations; slash and spread method-puff, bell, legomutton, bishops sleeves.
 - 3. Sleeve bodice combination; Magyar, raglan, dolman sleeves.
 - 4. Different types of collars.
 - 5. Different types of yokes.
- 2. Stitching of each sleeve, collar and yokes on bodice block.
- 3. Fashion designing (5 each) on sheet baby frocks, a line frocks, rompers. sun suits skirts and tops, bush -shirts with shorts.
- 4. Redesigning of old garment using the idea such as; to consider factors such as money, creativity, individuality, skills, needs,
 - (i) Patchwork
 - (ii) Ornamental fabric.
 - (iii) Decorative embroideries
 - (iv) Trims
 - (v) Paints and dyes
 - (vi) Introduction of fashion designing in fashion shows.
- 5. Introduction fashion designing in fashion shows.

Max Marks 50

Paper III Principles of Stratigraphy and page 3 hrs. duration - Max Macks . 50

Geology of India

Practical (one)

Max Marks 50

Paper I: Petrology

Section-A -Igneous Rocks

Composition of magmas; intrusive and extrusive forms; structure and texture;

Crystallization of basaltic magma, Bowens Reaction Principle, differentiation

Study of common igneous rocks: Granite why olite agabbic chasalt, pagmatite, it is a second of the common igneous rocks: Granite why olite agabbic chasalt, pagmatite, it is a second of the common igneous rocks: Granite why olite agabbic chasalt, pagmatite, it is a second of the common igneous rocks: Granite why olite agabbic chasalt, pagmatite, it is a second of the common igneous rocks. dolerite, syenite and peridotite A PROPERTY STATES AND ASSESSED AND ASSESSED.

Section-B- Sedimetary Rocks

Process of formation of sedimentary rocks; lithification and diagenesis

Structure and texture of rocks; Elementary idea of sedimentary deposits, sedimentary environments and proventance

Study of common sedimentary rocks: Sandstone, limestone, shale, conglomerate of the sedimentary rocks: Sandstone, limestone, shale, conglomerate of the sedimentary rocks:

Section-C - Metamorphic Rocks

Agents and types of metamorphism; concept of grade and facies; Structure and classification

Types of metamorphism and their products metasomatism and anatexis

Study of common metamorphic rocks: Marble schist gneiss: quartzite, slate: water, www

Paper II: Principles of Stratigraphy and Geology of India:

Section-A

Principles of stratigraphy; standard stratigraphic scales principles of correlations

Palaeogeography of India in Permo-Carboniferous period, Physiographic subdivisions of India

Stratigraphic divisions in India and their equivalents

Section-B

Stratigraphy, distribution, lithology and corgelation of the Aravalli, Delhiands

Distribution, succession, climate, correlations fossil contentiand mineral resources of the Gondwana Supergroup.

Section-C

Lithology, succession, distribution and fossil content of Triassic of Spiti, Jurassic of Kachchh, Fertiary period, Siwalik Supergroup

Origin, composition, distribution and age of Deccan Traps; Fectoric framework of

Practical

Study of typical textures of rocks; Megascopic study of con mon Igneous, sedimentary and metamorphic rocks; Microscopic studies of granite; rhyolite; gabbro; dolerite, limestone, sandstone, schist, gneiss and roable.

ineat drawings of paleogeographical maps of India during Permo-Carboniferous;

Distribution of warious geological formation in outline map of India; Identification;

and description of the representative stratigraphic tooks.

Scological field work and collection of samples and

Scheme:

Theory

Max Marks: 100

Min. Marks:36

Paper 1

3 hours duration

Max Marks:50

Paper 2

3 hours duration

Max Marks:50

Practical

4 hours duration

Min. Marks: 18

Max Marks:50

Note:

- 1. Two types of Question papers for each theory paper will be applicable. Total duration of 3 hours for each paper. One question paper will comprise of the objective questions and the other will be of descriptive type question.
- 2. Descriptive type question paper (to be given during 1st 2 hours of examination) will have 9 questions from each section out of which a student is supposed to attempt 4 questions selection at least 1 from each section. This portion of the paper will carry maximum 30 marks. Each descriptive question will be of 7.5 marks.
- 3. The objective question paper will be given after 2 hours of commencement of descriptive type paper and will have 35 questions of the objective type. This portion of the paper will carry 20 marks. The objective type questions will be of the following types:
 - a. Multiple choice type questions:20 questions of ½ marks each.
 - b. Fill in the blanks/one word/true or false type questions:10 questions of ½ mark each.
 - c. Very short answer type questions:5 questions of 1 mark each

Paper I: Environmental Pollution

Section-A

- 1. Sources and Classification of Air pollutants; aerosols, gases, vapors.
- 2. Meteorological Aspects; Factors affecting Air Pollution, wind roses, plume behavior, estimation of plume rise.
- 3. Air Pollution modeling; Dispersion models, Pasquill model, ASME model, Gaussian plume model, assumption, limitation applications.
- 4. Effects of Air Pollution; effects on economics, effects on environment and effects on human beings.
- 5. Global effects of Air Pollution, Greenhouse effect, Global warming, climate change, Acid rains, Ozone depletion.
- 6. Air Pollution due to automobile; Vehicular emissions, Motor fuel combustion, automobile emission mechanism from various vehicles.

Section-B

- 1. Classification of water pollutants.
- 2. Different types of sources of water pollution.
- 3. Types of wastewater and its quantum.
- 4. Effects of water pollution on Environment(Soil, organisms, vegetation, crop plants)
- 5. Effects of water pollution on human beings.
- 6. Pollution of water by Industries and power plants.
- 7. Marine pollution; quantum, types of pollutants, effects on water quality, organisms and ultimate effects on human beings.

Section-C

- 1. Various sources of Noise Pollution.
- 2. Methods of measurements of Noise Pollution.
- 3. Temporary effects of Noise Pollution on human beings.
- 4. Permanent effects of Noise Pollution on human beings.
- 5. Land pollution due to Municipal solid waste.
- 6. Pollution due to agricultural chemicals on land and crop plants.

Paper II: Computer Techniques, Environmental Biotechnology and **Environmental Microbiology**

Section A

- 1. Biotechnology and its possible role in Environmental conservation.
- 2. Oil Slicks, oil spills, pesticide, tannery food industries and applications of biotechnology.
- 3. Bioremediation: Bioremediation of polluted soil.
- 4. Hazardous wastes in environment and use of Biotechnology.
- 5. Air Pollution abatement and Biotechnology (Bio scrubbers, Bio beds, Bio trickling filters).
- 6. Biotechnology and Wastewater treatment.

Section B

- 1. Microbiology and its possible role in solution of Environmental Challenges.
- 2. Air borne diseases and causal organisms.
- 3. Water borne diseases and causal organisms.
- 4. Role of microbes in metal recovery.
- 5. Role of microbes in pest control.
- 6. Degradation of pesticides in environment and soil.
- 7. Vermitechnology and waste treatment.

Section C

- 1. Software MS Word and its possible role in environmental challenges.
- 2. Software XP and environmental Challenges.
- 3. Role of Websites and internet in environmental conservation.
- 4. Wind rose formation and its application in environmental monitoring.

Suggested Field and Laboratory Exercises

- 1. Estimation of SPM (Suspended Particulate Matter) from heavy traffic and busy areas.
- 2. Estimation of CO₂.
- 3. Estimation of SO_{x} .
- 4. Estimation of NO_x.
- 5. Preparation of pollution roses.
- 6. Estimation of Noise Levels from busy areas.
- 7. Estimation of Noise Levels from Silence zone (Hospital area, sanctuaries, National Parks)
- 8. Estimation of pH of water.
- 9. Estimation of EC of water.
- 10. Estimation of TDS of water.
- 11. Estimation of Chlorides.

- 12. Visit to various water harvesting structures (traditional water harvesting structures), ponds, bawries, kunds, kacchatanka, puccatanka.
- 13. Collection of water from surface water sources, tankas etc.
- 14. Estimation of pH, EC, TDS, Chlorides, Oxygen, alkalinity etc. from surface water sources of different locations.
- 15. Estimation of pH, EC, TDS, Chlorides, Oxygen and fluoride determination of ground water collected from different sources.
- 16. Visit to sewerage treatment plants. Collection and analysis of water from sewerage plants.
- 17. E-coil count and other microbe identification.
